WORK EXPERIENCE

Titansoft Pte Ltd | Product Developer Aug 2025 – Present

- Independently redesigned third-party data and status processing, reducing transaction failures caused by status handling from 10% to under 1%.
- Conducted load testing with k6 and implemented system stability improvements ahead of a major traffic event; provided production support for a platform with peak concurrency of 100,000 users.
- Upgraded 11+ projects to Kafka KRaft, preserving backward compatibility and completing the migration with zero downtime.
- Implemented Kafka consumer lag alerts to detect processing delays before user reports, and built Grafana dashboards to assess the latency impact of a new feature across enabled and non-enabled user groups.
- Key Technologies:** .NET Core, Kubernetes, Microsoft SQL Server, Kafka, Redis, Vue.js

Integro Technologies Pte Ltd | Software Engineer Intern Jan 2024 – May 2024

- Containerized a Java Spring Boot microservice with Docker and validated it on Kubernetes, leveraging a MongoDB-backed scheduler to persist and automatically retry failed PDF re-orientation callbacks.
- Optimized the **SmartLender** platform by developing a jQuery-based front-end module that seamlessly integrates Google's Material Design library, keeping average page-load times under 200ms after the visual upgrade.
- Key Technologies:** Spring Boot, Microservices, jQuery, JavaScript, MongoDB

BioKube Asia Pacific Pte Ltd | Software Engineer Intern Jul 2023 – Dec 2023

- Revamped existing .NET application codebase by refining Modbus communication, achieving a 50% improvement in remote access communication.
- Developed a Linux deployment script for provisioning and managing Azure Virtual Machines, incorporating OpenVPN setup to securely connect remote IoT systems.
- Key Technologies:** .NET, Azure Virtual Machine

PROJECTS

NTUTori | Student Marketplace for Second-Hand Trading Aug 2024 – Nov 2024

- Developed a marketplace platform with an auto-bidding algorithm and streamlined order placement for second-hand items.
- Designed and implemented a scalable microservices backend using Java Spring Boot and PostgreSQL, enabling modularity and scalability.
- Integrated Google Cloud Pub/Sub to build a highly scalable event-driven architecture, enabling 10x traffic spike handling without performance degradation.
- Implemented Redis caching at the API gateway layer to reduce backend load and improve response times.
- Key Technologies:** Spring Boot, PostgreSQL, Google Pub/Sub

EDUCATION

Nanyang Technological University, Singapore Aug 2021 – May 2025

Bachelor of Computing in Computer Science with Honours

- Specialization – Artificial Intelligence
- Honours (Highest Distinction) | CGPA: 4.61/5.00
- CCDS Dean's List AY2023/2024, AY2024/2025

SKILLS

Languages & Frameworks : .NET, Vue.js, Spring Boot
Databases & Caching : SQL, MongoDB, Redis
DevOps & Tools : Kubernetes, Git, Docker, Linux, AWS, Kafka
Languages : English (Native), Mandarin (Native), Malay (Proficient)
