EDUCATION

Nanyang Technological University, Singapore

Aug 2021 – Jul 2025

Bachelor of Computing (Honours) in Computer Science

- CGPA: 4.53/5.00 (Highest Distinction)

WORK EXPERIENCE

AV Media Pte Ltd

Jun 2024 – Present

Software Engineer Intern

- Developed a speech-to-text feature with auto language detection using Azure Speech Services.
- Utilised Azure Document Intelligence for enhanced information processing before integrating with Azure AI Search.
- Designed an avatar front-end for an interactive receptionist, providing seamless real-time visitor interaction.

Integro Technologies Pte Ltd

Jan 2024 – May 2024

Software Engineer Intern

- Implemented a dynamic UI feature in jQuery and JavaScript, allowing users to customise their interface with Material Design preferences.
- Engineered a MongoDB-based scheduler within a Microservice to manage retries of failed PDF reorientation tasks, ensuring reliable delivery to the callback server.

BioKube Asia Pacific Pte Ltd

Jul 2023 – Dec 2023

Software Engineer Intern

- Enhanced a .NET application by reducing response times for remote accessing by over 50%.
- Implemented sewage treatment log storage on Azure, featuring a graphical representation of historical data.
- Developed an Azure Function, triggered by CRON jobs, to automatically send email alerts about treatment system malfunctions, enhancing system reliability and user responsiveness.

PROJECTS

Exploiting Image Prior For Super-Resolution

Aug 2024 – Present

Supervisor: Prof. Loy Chen Change

- Develop a super-resolution approach leveraging deep generative priors to achieve improved contextual relevance in high-resolution outputs.

NTUTori: Student Marketplace for Second-Hand Trading

Aug 2024 – Present

- Develop product microservice with CRUD operations using Spring Boot and Azure Blob Storage for product listings and images.
- Design PostgreSQL schema and integrate advanced pgvector-based search for efficient embedding/vector searches and enhanced user experience.
- Implement pub/sub architecture with message queues for real-time notifications and auto-order features, ensuring optimal user interaction.

Multidisciplinary Design Project

Aug 2023 – Nov 2023

- Designed and optimized robotic pathfinding with a modified A* algorithm, leveraging multiprocessing and parallel brute force for enhanced efficiency
- Achieved 5th place for Task 1, secured 2nd place for Task 2, and selected as the top group to showcase Multidisciplinary design project at NTU Open House.

FindR: E-commerce Price Comparison Web Application

Aug 2022 – Oct 2022

- Co-developed a full-stack Django, React, and PostgreSQL application for e-commerce price comparison, supporting robust search and filter capabilities.
- Implemented web scraping techniques using BeautifulSoup and Selenium to obtain product information from Shopee, Lazada and Amazon.
- Deployed web application using Azure App Service, ensuring scalability and optimal performance.

TECHNICAL SKILLS

Programming Languages : Java, Python, JavaScript, C#, SQL, PostgreSQL

Libraries & Frameworks : Spring, Django, .NET, ReactJs, Pytorch

Tools : Microsoft Azure, Unity, Git, STM32, Raspberry Pi

Interest : Contributions to Open-Source project
