WORK EXPERIENCE

Titansoft Pte Ltd | Product Developer Aug 2025 – Present

- Independently redesigned third-party data and status processing, reducing status-related transaction failures from 5–10% to under 1%.
- Conducted load testing with k6 and implemented system stability improvements ahead of a major traffic event; provided production support for a platform with peak concurrency of 100,000 users.
- Upgraded 11+ projects to Kafka KRaft, preserving backward compatibility and completing the migration with zero downtime.
- Implemented Kafka consumer lag alerts to detect processing delays before user reports; built Grafana dashboards to compare feature latency across enabled and non-enabled user groups.
- Use Claude agents for production support investigations and daily development, following a structured workflow of planning, test-driven development (TDD), and implementation.
- Key Technologies:** .NET Core, Kubernetes, Microsoft SQL Server, Kafka, Redis, Vue.js

Integro Technologies Pte Ltd | Software Engineer Intern Jan 2024 – May 2024

- Implemented persistent retries for failed PDF re-orientation callbacks using a MongoDB-backed scheduler; containerized the Spring Boot service with Docker and validated deployment on Kubernetes.
- Developed a jQuery front-end module integrating Google's Material Design library to modernize the SmartLender interface.
- Key Technologies:** Spring Boot, Microservices, jQuery, JavaScript, MongoDB

BioKube Asia Pacific Pte Ltd | Software Engineer Intern Jul 2023 – Dec 2023

- Refactored Modbus communication in an existing .NET application to improve communication with remote systems.
- Developed a Linux deployment script to provision and manage Azure Virtual Machines, including OpenVPN configuration for secure connectivity to remote IoT systems.
- Key Technologies:** .NET, Azure Virtual Machine

PROJECTS

NTUTori | Student Marketplace for Second-Hand Trading Aug 2024 – Nov 2024

- Developed a second-hand marketplace with automated bidding and order placement, backed by Java Spring Boot microservices and PostgreSQL.
- Integrated Google Cloud Pub/Sub for asynchronous, event-driven communication between services.
- Implemented Redis caching at the API gateway to reduce backend requests and improve response times.
- Key Technologies:** Spring Boot, PostgreSQL, Google Cloud Pub/Sub, Redis

EDUCATION

Nanyang Technological University, Singapore Aug 2021 – May 2025

Bachelor of Computing in Computer Science with Honours

- Specialization – Artificial Intelligence
- Honours (Highest Distinction) | CGPA: 4.61/5.00
- CCDS Dean's List AY2023/2024, AY2024/2025
- Relevant Coursework: Distributed Systems, Algorithm Design & Analysis, Advanced Software Engineering, Advanced Computer Networks

SKILLS

Programming: Java, JavaScript, SQL | Frameworks: .NET, Spring Boot, Vue.js

Databases & Caching: Microsoft SQL Server, PostgreSQL, MongoDB, Redis

Infrastructure & Tools: Kubernetes, Docker, Linux, Git, AWS, Azure, Kafka, Google Cloud Pub/Sub

Languages: English (Native), Mandarin (Native), Malay (Proficient)
